STRONG HEARTS IN PORIRUA

Our children are being hit by an evil illness called Rheumatic Fever. It disguises itself as a sore throat, but it really wants their strong heart! We can't let this happen. So, I'm working with our ambassador, Robert Fruean, and our team of doctors and nurses to tackle this head on.

Parents please, if your child has a sore throat, take them to see your doctor or local nurse straight away. Don't delay.
